

Amendments to the Specification:

Please amend the specification as follows:

At page 3, first paragraph:

In comparison to 'Fip 749', 'Fip 469' has a similar or slightly deeper main flower color, more distinct reddish veins at the bases of upper petals, but only weakly reddish colored peduncles, medium-green, instead of dark-green, foliage, taller plant habit, and later beginning of flowering.

At page 4, between lines 17 and 18:

Corolla:

Average diameter: 51 mm

Average depth: 8 mm

Form: Semi-double type

At page 6, lines 17 – 20:

Outdoor flower production: Continuously and moderately rich flowering, the flower count in 2003 in Hillscheid, Germany, indicated about 1.8 inflorescences per plant in mid May
